

Interactive Celestial Hero Canvas

`Route: /#/hero (Default Landing)`

The high-DPI interactive canvas greets visitors with the linocut celestial engraving artwork, mouse-responsive dual-axis parallax, and cursor-driven particle distortion.

- ✦ **Parallax Effect:** Moves dynamically on pointer movement & scroll depth.
- ✦ **Cursor Particle Scatter:** Pixels distort into floating warm ivory stardust under pointer.
- ✦ **Radial Burst Engine:** Click or HUD trigger to ignite particle explosion.
- ✦ **Ink & Ivory Palette:** Strict compliance with #07090a and #efe6cf aesthetic.

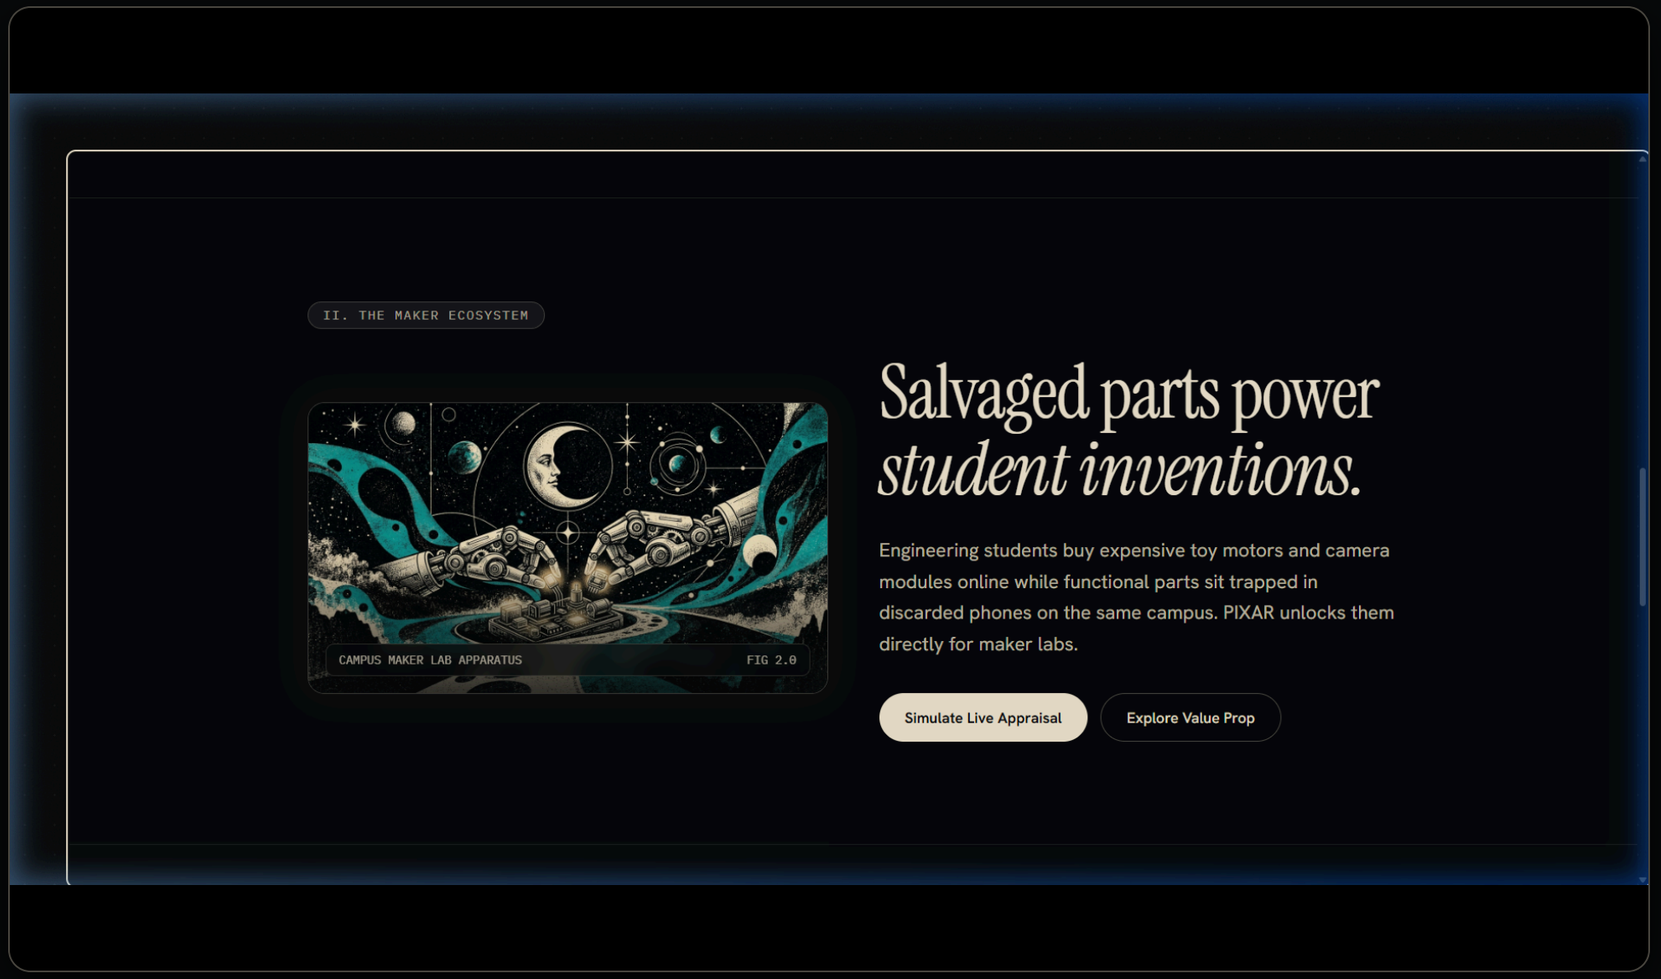

I. The Physical Substrate

`Route: /#/hero#next`

Narrative storytelling section introducing India's e-waste crisis with the first generated companion artwork: "Circuit Valley Substrate".

- ✦ **Matching Linocut Art:** Circuit board mountains & rivers under celestial crescent moons.
- ✦ **National Data Telemetry:** 16.0L Tonnes/Yr, 78% unaccounted, 94% recoverable.
- ✦ **Direct Deck Link:** Jump straight into Chapter 2 (The Problem Size) of the pitch deck.

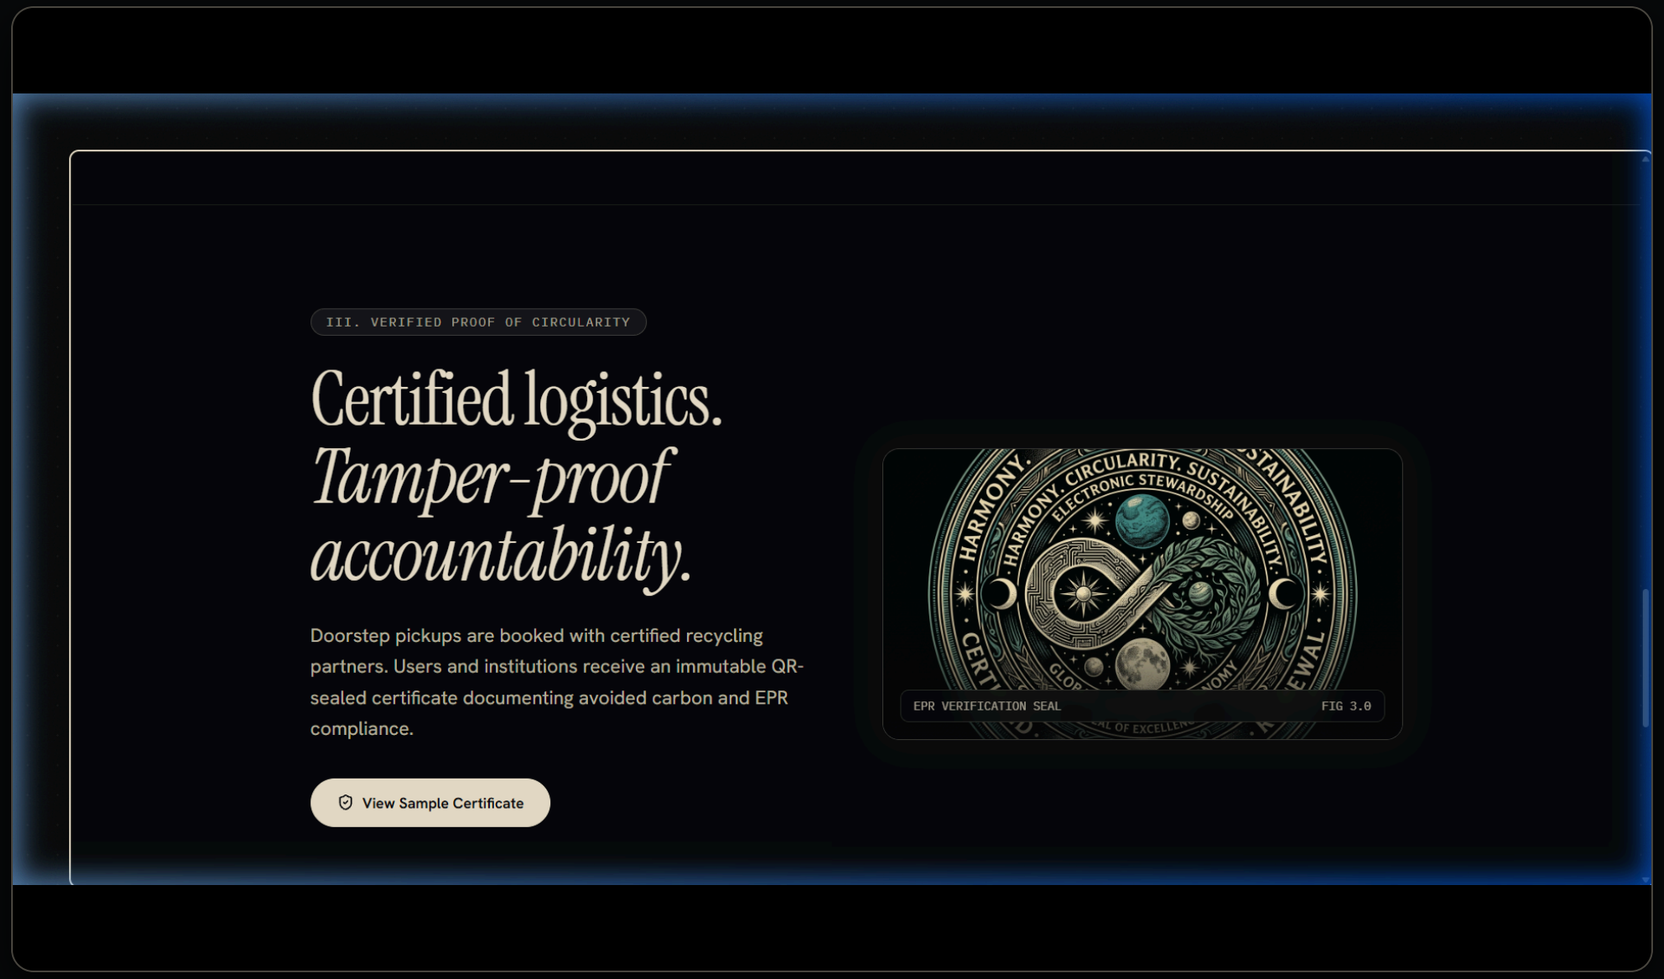

II. The Maker Ecosystem

`Route: /#/hero (Section II)`

Details how salvaged components power university engineering innovations, illustrated with the companion artwork: "Campus Maker Lab Apparatus".

- **Mechanical Artisan Hands:** Assembling micro-motors and sensors under starry skies.
- **Direct Value Proposition:** Unlocking trapped phone components for student robotics prototypes.
- **Appraisal CTA:** Instant launch button to test live camera device appraisal.

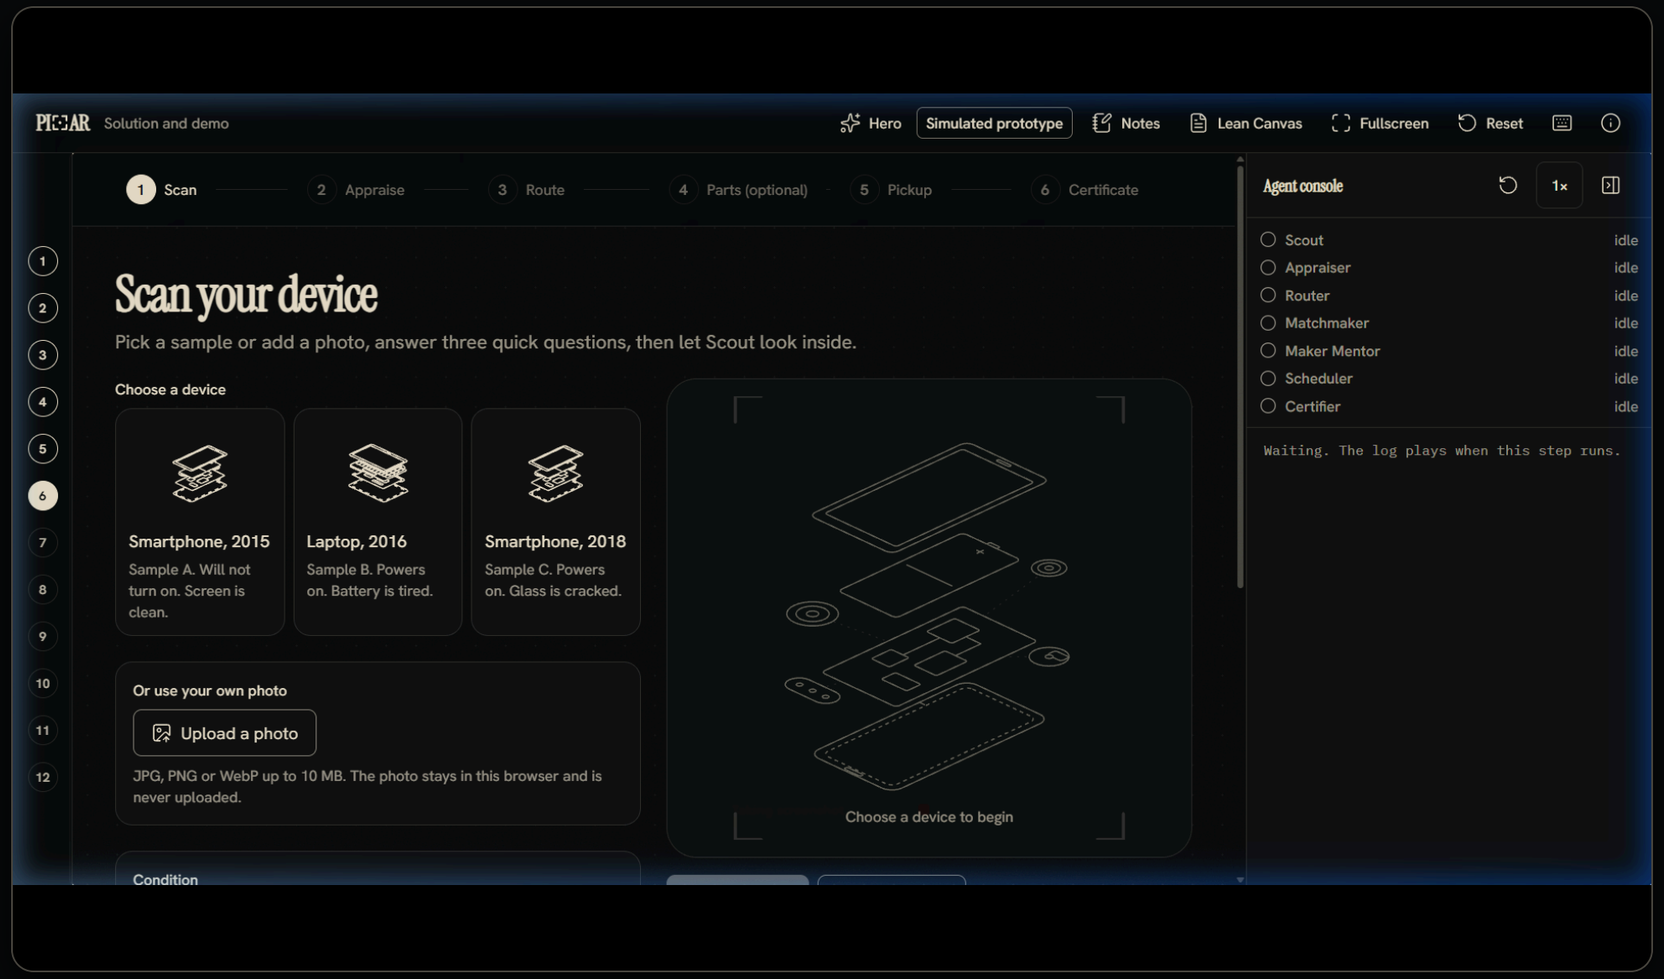

III. Verified Proof of Circularity

`Route: /#/hero (Section III & IV)`

Certified reverse-logistics and tamper-proof verification seal, featuring the companion artwork: "EPR Verification Seal".

- **Cosmic Circular Mandala:** Sacred geometry woodcut representing endless electronic renewal.
- **Doorstep Reverse Logistics:** Audited partnerships with CPCB-registered recycling facilities.
- **System Blueprint Matrix:** 12-chapter fast launcher connecting to all presentation slides.

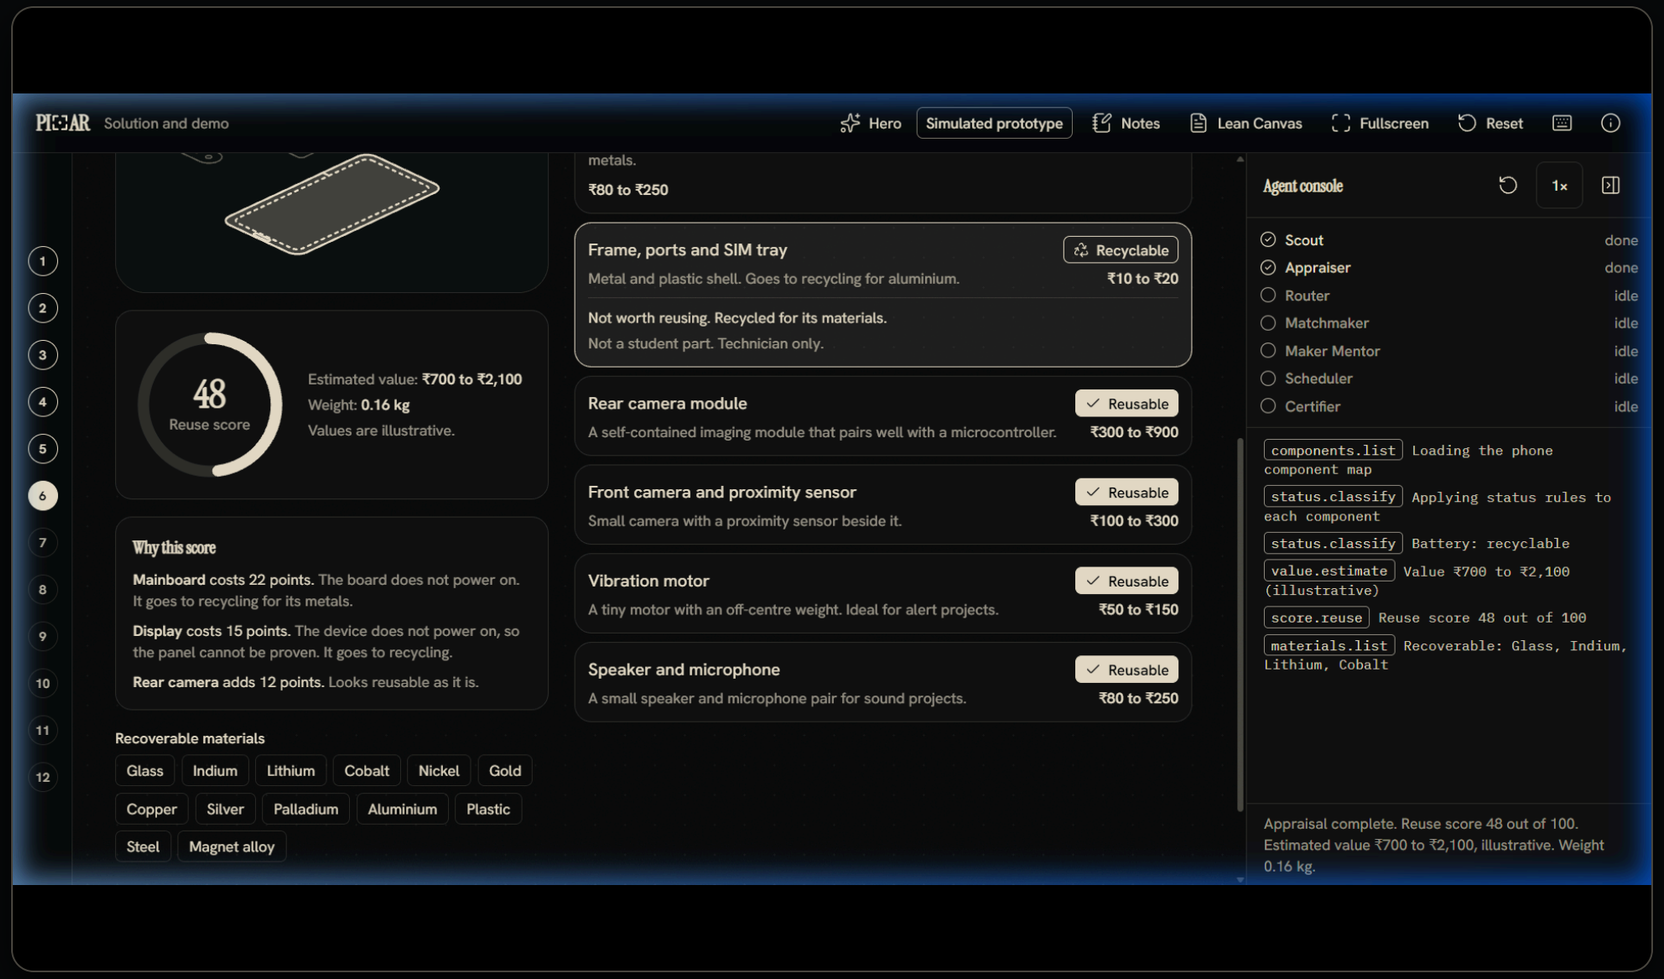

Step 1: Live AI Device Scanner

`Route: /#/demo/scan`

Real-time computer vision interface. Users point their camera or select sample devices (e.g. 2015 Smartphone, Raspberry Pi 3, Broken Tablet) for instant neural inspection.

- ✦ **Bounding Box Detection:** Visual model tracks device contours and ports.
- ✦ **Model Identification:** Identifies manufacturer, series, and chipset specs.
- ✦ **Physical Condition Scoring:** Detects screen cracks, chassis warping, battery swelling.
- ✦ **Sample Presets:** Preloaded electronics for instant offline evaluation.

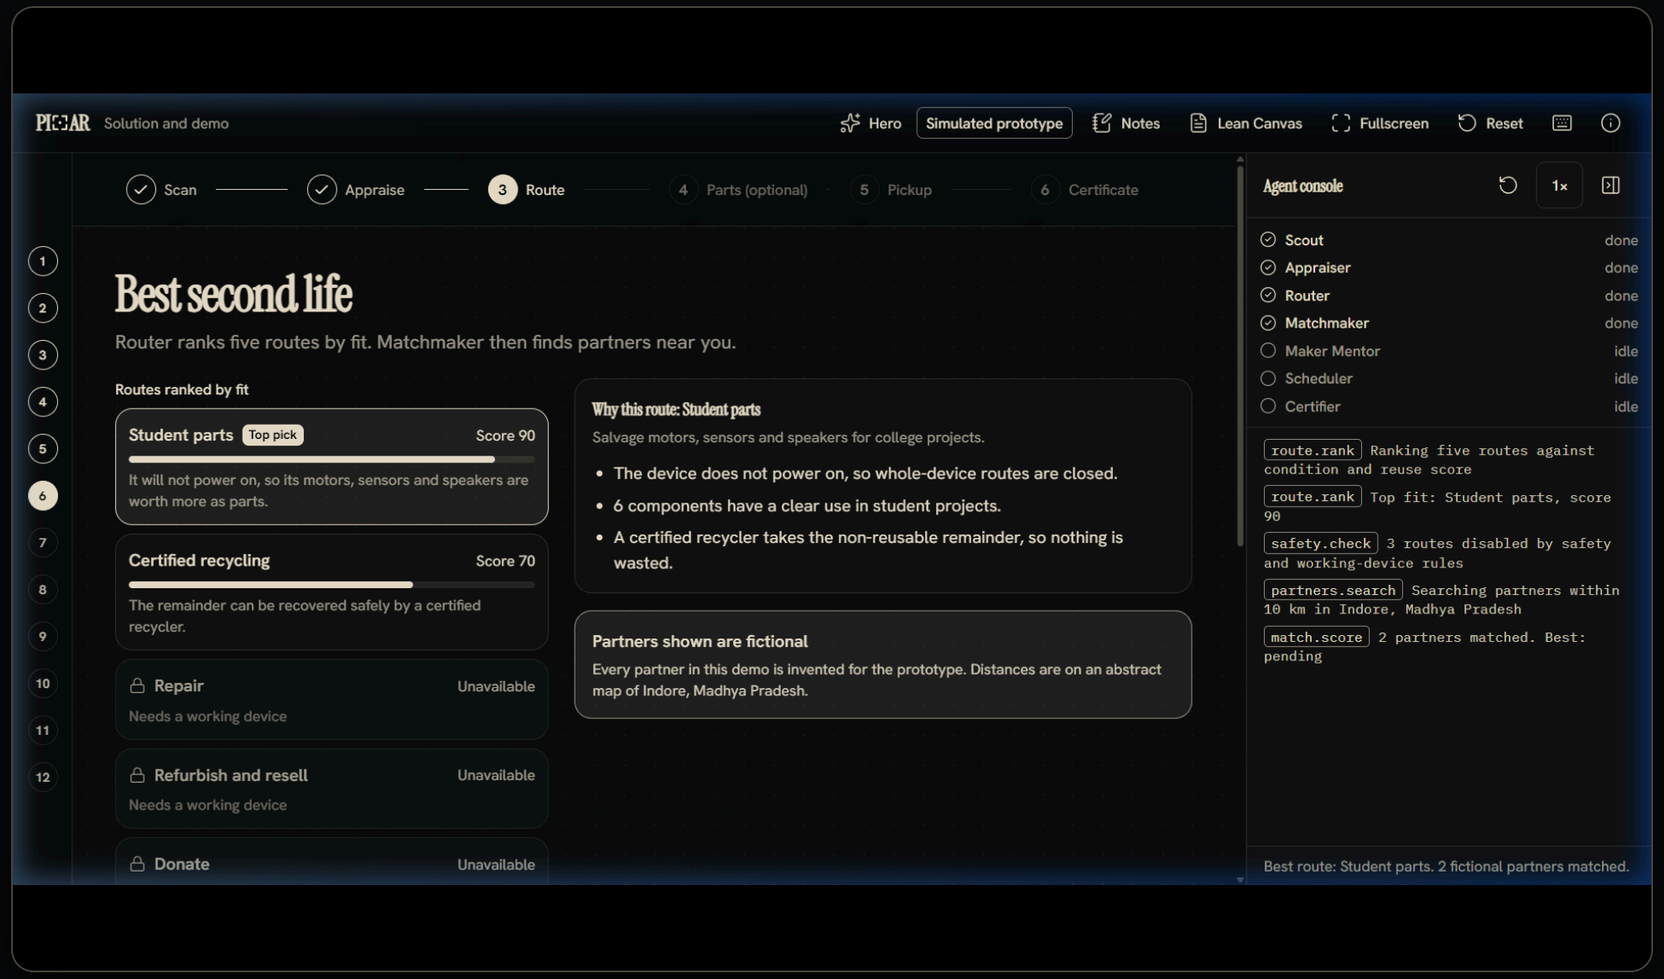

Step 2: Valuation & Diagnostics

`Route: /#/demo/valuation`

Detailed AI appraisal breaking down device health, estimated residual cash value, and harvestable materials before committing to disposal.

- **Residual Fair Value:** Calculated from current secondary market commodity prices.
- **Subsystem Breakdown:** Micro-controller, RAM, Flash Storage, Camera Sensor, and Battery health.
- **Materials Tonnage:** Estimated grams of copper, gold plating, and aluminum recoverable.
- **Decision Engine:** Recommends whether device is fit for refurbishment, salvage, or smelting.

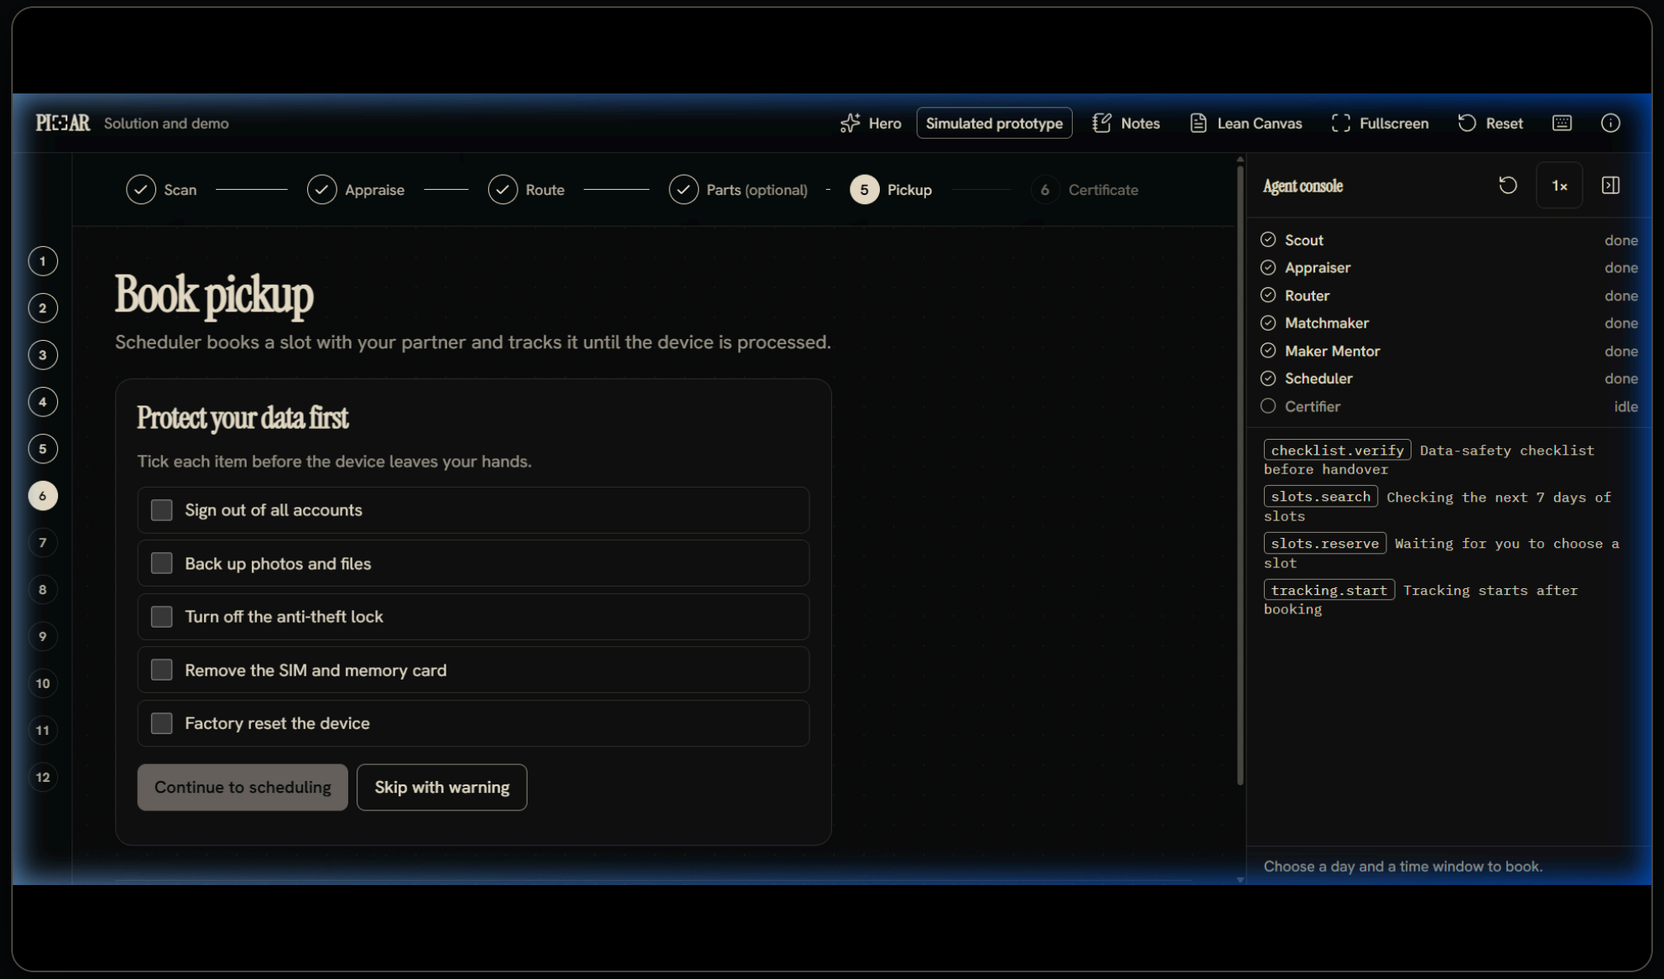

Step 3: Component Harvesting

`Route: /#/demo/route`

Automated component allocator matching functional internal parts to active student engineering projects on the local campus.

- ✦ **Vibration Motor:** Routed to Campus Autonomous Drone & Haptic Feedback Lab.
- ✦ **12MP Camera Module:** Allocated to Computer Vision & Smart Crop Inspection Project.
- ✦ **Lithium Polymer Cell:** Allocated to Solar Micro-Grid Sensor Station.
- ✦ **Interactive Teardown Map:** Visual step-by-step disassembly guide for safe extraction.

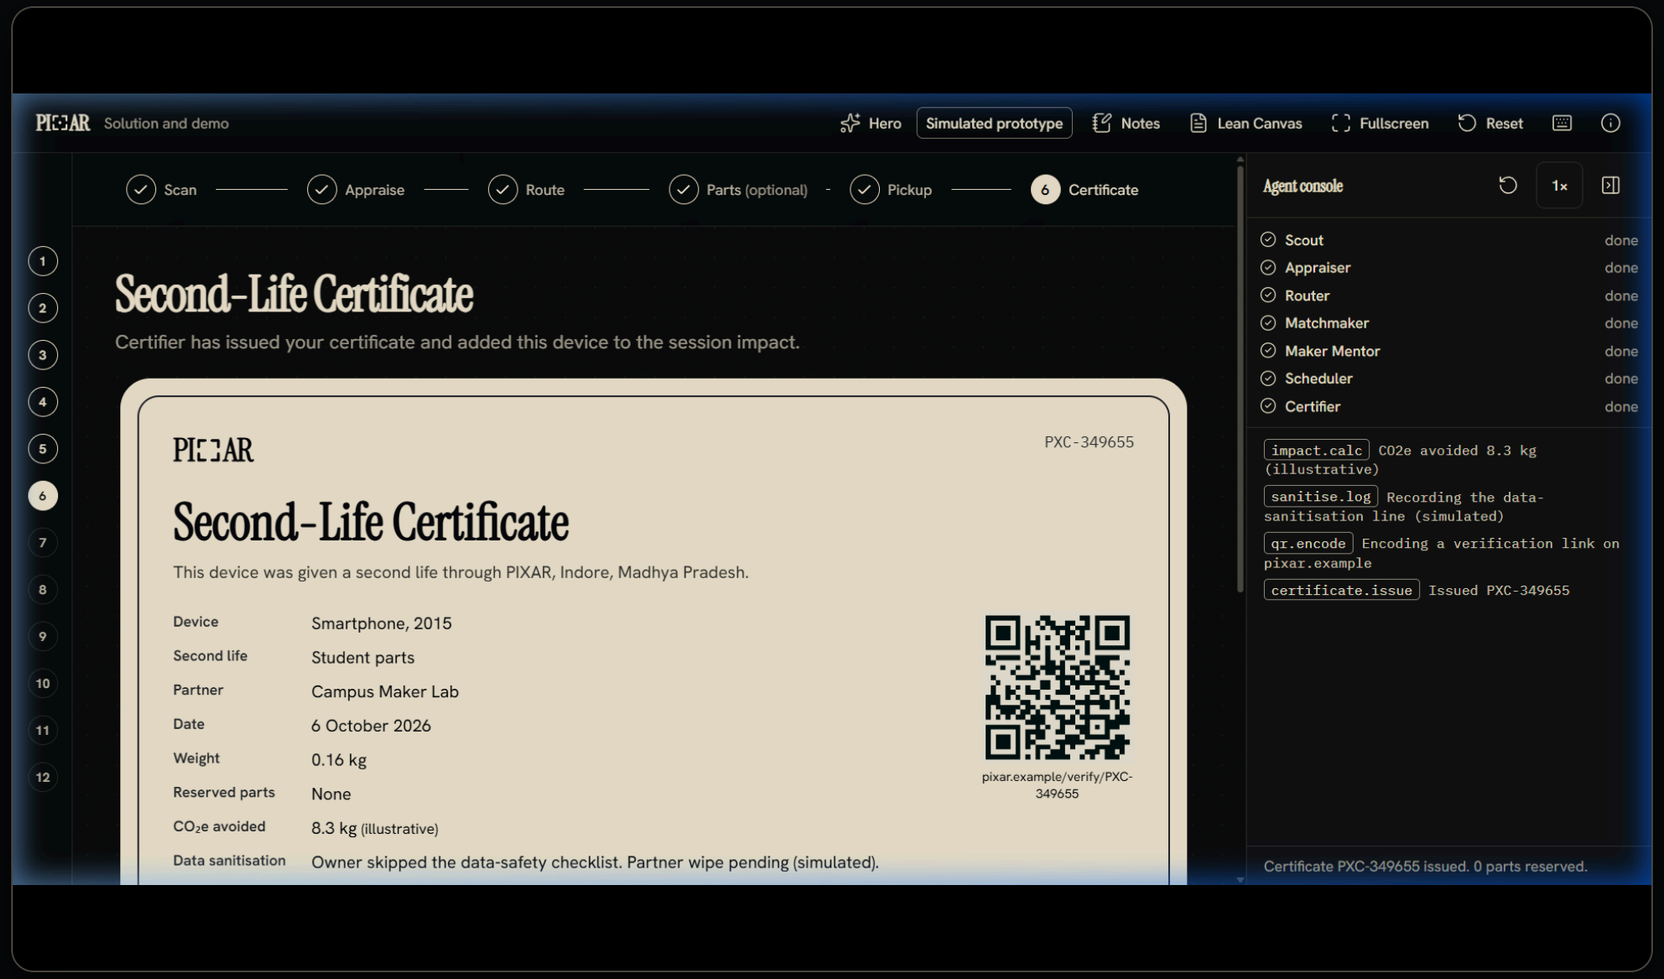

Step 4: Doorstep Pickup Booking

`Route: /#/demo/pickup`

Zero-friction reverse logistics scheduler connecting donors with certified CPCB recyclers for safe transport and certified processing.

- ✦ **Time Slot Selection:** Same-day or scheduled doorstep courier windows.
- ✦ **Certified Partner Matching:** Assigned to CPCB-registered recycling agents.
- ✦ **Battery Safety Protocol:** Guidance on safe packaging for degraded lithium packs.
- ✦ **Chain of Custody Tracking:** Digital dispatch barcode tracking shipment till delivery.

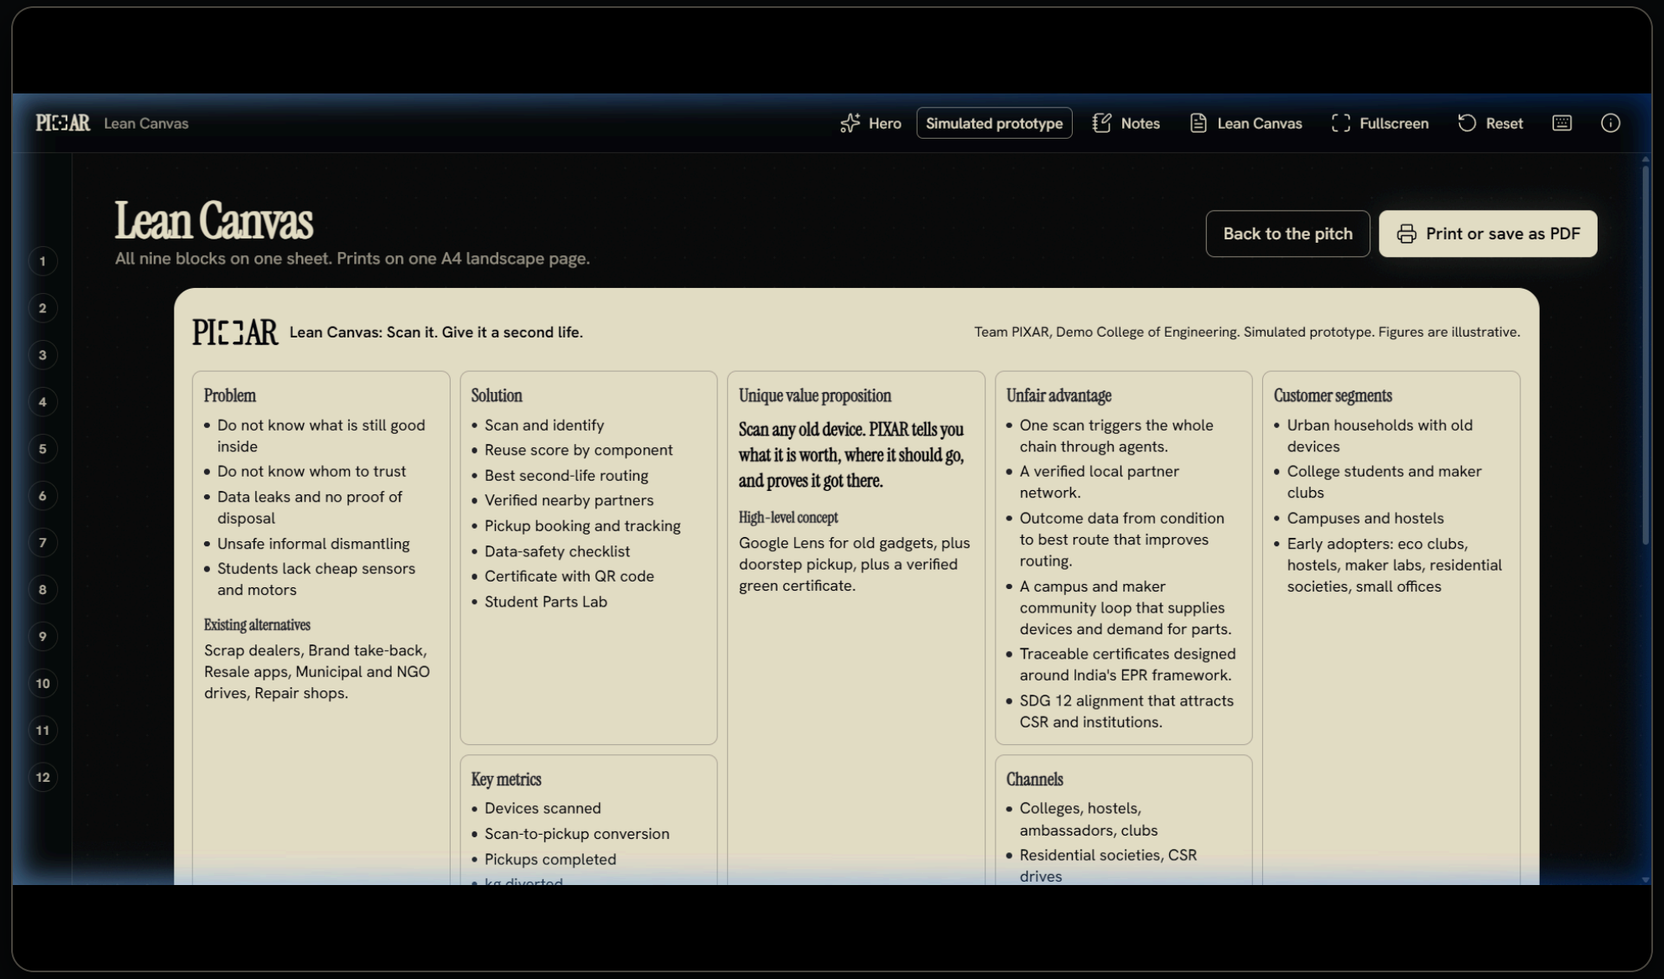

Step 5: Verifiable Certificate

`Route: /#/demo/certificate`

Cryptographically sealed Second-Life Certificate documenting the circular recovery lifecycle of the donor's device.

- **Verifiable QR Code:** Scannable cryptographic verification token.
- **Avoided Carbon Calculation:** 18.4 kg CO_2e greenhouse gas emissions prevented.
- **Toxic Metals Neutralized:** Certified zero heavy-metal landfill contamination.
- **Institutional EPR Token:** Official compliance record for college & corporate ESG audits.

Interactive Lean Canvas Matrix

`Route: /#/canvas`

Built-in interactive Lean Canvas dashboard rendering the complete 9-block business model directly inside the web application shell.

- **9-Box Grid Layout:** Problem, Solution, UVP, Channels, Revenue, Cost, Metrics, Moats.
- **Interactive Expand/Collapse:** Deep-dive notes for each business block.
- **Print & Export Button:** Direct trigger to print clean paper canvas copies.
- **IBM SkillsBuild Alignment:** Structured specifically for the Masterclass pitch requirements.
